

## Mephadrone

*Voiceover: We gave two porcupines equal amounts of Mephadrone and had our scientists monitor the results.*

*Porcupine A was euphoric, alert, gregarious and very empathic.*

*Porcupine B experienced paranoia, anxiety, fits, severe nose bleeds, heart palpitations, blurred vision, convulsions, depression, irritability, drowsiness, seizures nausea...*

*(fades and porcupine screams!)*

*Voiceover: We don't know why porcupine B had such a bad time but we'll be sure to let you know when we do!*

**Porcupine:** Growl!

*Voiceover: Mephadrone! It's unregulated and untested so if anything goes wrong, you'll be the first to find out!*
